Objective

AI Engineer with 1+ year of hands-on experience developing real-time solutions in computer vision, generative AI, and NLP. Proven ability to deliver production-ready tools using OpenCV, LangChain, and LLMs, boosting productivity and accuracy by 20–95% across various applications. Passionate about transforming complex AI models into practical, user-friendly systems.

EDUCATION

Rajiv Gandhi University of Knowledge and Technology

Feb 2022 - Mar 2026

B.Tech, Computer Science

Nuzvid

• **GPA:** 8.4

Rajiv Gandhi University of Knowledge and Technology

Jan 2020 - Feb 2022

Pre-University Course (PUC)

Nuzvid

• **GPA:** 9.5

SKILLS

- **Programming Languages:** Python, Java, C++, SQL
- **Frameworks & Libraries:** Tensorflow, Pytorch, LangChain, Opencv, Keras, MediaPipe, Gradio, Crewai, Unsloth ai, Grafana, Rest APIs, Hugging Face, Fastapi
- **Tools:** Selenium, Web Scraping, Docker, Kafka, Grafana, scikit-learn, Pandas, NumPy, Matplotlib, Streamlit, Vector database
- **AI Expertise:** NLP, Computer Vision, Model Training & Tuning

EXPERIENCE

ML Intern

May 2025 - Jun 2025

Moksa Ai

Madhapur, Hyderabad

- Assisted senior ML engineers in resolving model-related support tickets and improving existing ML pipelines.
- Teamed up with DevOps to resolve real-time production issues, ensuring model stability and uptime.
- Wrote automation scripts for model training and improved the accuracy of several object detection models by 5%.
- Partnered with data labeling team and benchmarked production models to enhance overall system performance.

AI Intern (Computer Vision)

Mar 2025 - Apr 2025

SreeVia AI Technologies

Remote

- Spearheaded the development of an AI-powered monitoring system for a government exam mock-test platform.
- Used OpenCV and Google ML Kit to detect and flag suspicious behavior during mock tests in real time.
- Jointly worked with closely with the app development team to deploy the model seamlessly within the mobile app.
- Contributed to simulating a secure and exam-like environment for millions of competitive exam aspirants.

Deep Learning & LLM Intern

Dec 2023 - Mar 2024

WoWExp: India's 1st Metaverse and GenAI Company

Remote

- Developed and launched the first version of WOW FINGPT, leveraging LangChain, Generative AI models, and machine learning, enabling 3x faster stock analysis.
- Led a team of 3 developers, successfully delivering the project 2 weeks ahead of schedule, contributing to company growth.
- Built in automated analysis (fundamental, technical, and sentiment) to recommend whether to invest or stay out.

PROJECTS

Research Paper Analysis Tool | [Github](#)

Feb 2025 - Mar 2025

- Implemented a research paper analysis tool that summarizes content from PDFs, URLs, ArXiv, and DOI inputs.
- Used Google's Gemini model for generating accurate, readable summaries of academic papers.
- Added audio narration with ElevenLabs to make research content more accessible and user-friendly.
- created features like cross-paper synthesis and topic-wise classification to help users save time and study smarter.

News Recommendation System | [Github](#)

Dec 2024 - Jan 2025

- Engineered a personalized news recommendation system using FastAPI, SQLAlchemy, and NewsAPI.
- Implemented user login/signup, article storage, and real-time interaction tracking (likes).
- Developed a content-based recommendation algorithm to suggest articles based on user preferences.
- planned clean RESTful APIs to fetch news, record user behavior, and deliver tailored recommendations.

ACHIEVEMENTS

- **Hackathons:** Participated in hackathons Like SIH, showcasing innovation and collaborative problem-solving
- **Academic:** Recognized as the Best Student of the Year for my overall performance.
- **Team Member for SM:** Worked as a team member of Student Myntra, where I managed events and fests.
